## **Next Meeting: Wednesday 08/23/2017**

Time 7:30 PM. Place: Lehigh and Northampton Transportation Authority Headquarters (LANta), 2nd Floor Meeting Room, 1060 Lehigh Street, Allentown, PA 18103. Latitude : 40.587607 | Longitude : -75.474405. Bring a guest!

Don't get locked out. If you arrive late, the main door of the LANta office building may be locked. This is for security purposes. But the facility is open around the clock, so ask one of the garage employees to direct you to the second floor.

*The Fifth Wheel* is published monthly by Lehigh Valley Corvair Club Inc. (LVCC). We accept articles of interest to Corvair owners for publication. Classified advertising of interest to Corvair owners is available free of charge to all persons. Commercial advertising is also available on a fee basis. For details, email our newsletter editor, Allan Lacki, [redbat01@verizon.net](mailto:redbat01@verizon.net).

# ***Das Awkscht Fescht 2017***

## ***by Randy Kohler***

The 54th annual Das Awkscht Fescht is in the books and we had quite a nice weekend for a change. Most years it is sweltering hot or pouring, but this year was quite comfortable! Friday was humid, but Saturday and Sunday were breezy and low in humidity.

Saturday the cars are parked by year based groups instead of AACA grouping as in the past. There was a nice toy show at the Eyer school with many vendors and nice merchandise. I almost bought a mint '62 Monza promo, until I realized \$185 is more than I have paid for some "real" Corvairs! The flea market is still shrinking at the park with internet and retiring vendors being part of the problem.

The Vintage Chevrolet Club of America had a nice feature display under the tent and had two rows of Camaros lined up in observance of their 50th anniversary. The participation awards for the three days as well as dash plaques were a tote bag, folding chair, and a thermos respectively. The bands all weekend were great and the fireworks Saturday evening were outstanding.

Sunday was individual club day and Dennis Weaver and I parked 45 of our beautiful Corvairs next to the ball field in Macungie Memorial Park.

A breakdown of displayed cars included 5 early open, 12 early closed, 9 late open, 16 late closed and 3 forward control, all Rampsides! Also we were lucky to have 1 station wagon on display! 40 Corvairs hailed from Pennsylvania, 4 from New Jersey and 1 from Delaware.

Clark's Corvair Parts was kind enough to send us a nice assortment of door prizes ranging from the ever popular gift certificates, oil filters, fan belts, books and catalogs for us to distribute. President Dennis Stamm also brought in a bunch of merchandise so everyone received something.

Thanks to Dennis Weaver for bringing the tent and table as well as parking cars, Clark's and Dennis Stamm for door prizes, Dick Weidner for signs and banners and a special thanks to the Stamms' grandson Connor who was my assistant at the door prize awards.

Hope to see you all next year at the 55th annual festival featuring the Packard automobile!  
Randy

### ***Houser's Auction***

Check out Houser's auction site for a huge auction at the Schnecksville fire company September 9th! The auction will include a red late model convertible with a 140.

<http://houserauctioneers.com/events/>

Here are the details about the Corvair. It is a red 1965 Monza convertible equipped with a 140 hp 4 carb engine, automatic transmission, white power top. It has 68,952 miles on the odometer and has been garage kept since '78.

In addition to the Corvair, there will be a huge number of other items up for auction. Here is what Houser Auctioneers has to say about this event:

*Houser Auctioneers is honored to present this once in a lifetime automobile and automobilia public auction. This*

This 140 hp Powerglide Corvair will be one of the items up for auction at the Houser's auction.

Tom Hambel

Oldies. We don't need no stinkin' push rod tubes!

*sale will be the first of several sales liquidating a classic car inventory of nearly 100 vehicles. Virtually all of these vehicles has been stored for well over three decades in a dry, climate controlled facility. Most of the vehicles are in running or near running order.*

*The classics that are not operational represent outstanding restoration candidates as most are complete with very good sub structures. The photos provided are of the best quality at this time. Due to the vast amount of property in the warehouse, additional pictures will be taken as the clean out continues and the opportunities present themselves.*

*In addition to the vehicles, there is an enormous amount of N.O.S. parts as well as automobilia from 5 decades of collecting. Added to that are a variety of other very collectable pieces promising something for everyone.*

## **Velvetouch Linings**

Richard Finch, author of "How to Keep Your Corvair Alive", was and maybe still is a big advocate of Velvetouch-brand brake linings for Corvairs. In Chapter 9 of his book, he recounts a story of a near-miss he had while towing his Yenka Stinger race car with his '65 Corvair sedan.

"I was towing the Yenka Stinger race car to Sears Point Raceway in 1969 and had to make a panic stop coming down a hill in San Francisco. The right-rear brake locked and slid the right rear tire, but the other three wheels just kept rolling along. I just sat there with a horrible feeling until the car finally stopped about 1 inch from my friend's race car and trailer in front of me.

The following Monday morning, I went to my local parts store (not Chevrolet!) and ordered a set of Velvetouch brake linings. My 1965 Corsa 4-d00 (converted from a Monza) has gone over 60,000 miles with no brake fade or problems

since. I still have over 60% lining left, and my brake drums still look good."

Richard goes on to say, "The Velvetouch brakes do not fade when they get hot, but actually get better as they get hotter. They stop better when cold than standard brakes do under any conditions.... Velvetouch brakes are almost totally fade-resistant when wet. If you drive through a deep water puddle, you will still have brakes with Velvetouch, whereas stock brakes make you feel like you are going faster when you try them when they are wet."

The copyright date is 1986 for my copy of "How to Keep Your Corvair Alive." That begs the question, are these magical brake linings still available for Corvairs? Well, you might find them on eBay from time to time, but generally speaking, nobody stocks them anymore.

In the June 2017 issue of Hemmings Muscle Machines, a reader asked about the availability of high performance drum brake linings for his 1967 Camaro. His Camaro was originally equipped with RPO J65, a one-year drum brake option that added sintered metallic brake shoes on all 4 drums.

The Hemmings people checked several supply houses and found that none stocked NOS linings for RPO J65, which was not surprising given that it was so rare. Only 1,217 Camaros were equipped with RPO J65.

Hemmings also researched other possibilities, including the equivalent sintered metallic brake linings offered by Velvetouch. None of the parts houses stock them any more. Finally, Hemmings contacted Velvetouch directly. The company is still in business and produces brake and clutch linings for industrial and heavy-duty trucks. However, they no longer offer passenger car brake shoes.

You may be wondering about the relevance between Corvair and Camaro drum brakes. The rear shoes in the 1967 Camaros, Chevelles and Novas were nearly the same as the front shoes on the 1965-'69 Corvairs, and the rear shoes on the Corvairs also fit the front of the Camaros, Chevelles and Novas.

As it turns out, an outfit named Porterfield Racing Brake Pads offers carbon-kevlar brake linings for all these cars, including 1965-69 Corvairs. The carbon-kevlar linings should perform very closely to the original sintered metal brake shoes.

This is what Porterfield says about the lining materials it uses.

*R-4 Full Race – Our R-4 racing brake shoes are high-temperature bonded, then arched to drum specifications and finally copper riveted to the brake shoe core to ensure the strongest material adhesion. These brake shoes will withstand the most rigorous racing condi-*

## Corvair Cooking Corner!

### By Mary Ann Stamm

Here's a great recipe for colorful M&M Cookies from Mary Ann!

#### Ingredients:

1 cup shortening  
 1 cup packed brown sugar  
 1/2 cup granulated sugar  
 2 teaspoons vanilla extract  
 2 1/4 cups of flour, sifted  
 2 eggs  
 1 teaspoon salt  
 1 1/2 cups of M&M candies

#### Instructions:

Blend together shortening, brown sugar and granulated sugar in a large bowl. Beat in vanilla and eggs. Sift dry ingredients together. Add to sugar mixture, blending well. Stir in 1/2 cup of candy (reserve remaining for decorating). Drop from teaspoon on ungreased cookie sheet. Bake in oven at 350 degrees for 8 to 10 minutes.

tions with consistent and powerful stopping performance.

For rare vintage and other odd applications customer may be required to furnish brake shoe cores. We are able to reline virtually any type of brake shoe. When ordering please specify a drum diameter for arching purpose.

#### R-4 Woven Kevlar

Porterfield's Woven Kevlar is high friction woven composite material designed for use in mechanically actuated drum brake systems. It has very high friction at ambient and low temperatures for good initial bite and may be bonded to aluminum or steel brake shoe cores. Trusted by top car mechanics to stop the most valuable of vintage vehicles safely, without any unnecessary

drum wear. This material is widely used in vintage racing and vintage touring events on vehicles with mechanical drum brakes.

#### RD-4 compound

The RD-4 brake shoe material is our new addition to our line of high performance brake shoe linings. This material incorporates the latest in brake shoe material research and development and is suitable for all types of racing. Improved touring and vintage race cars with hydraulic drum brake will benefit from an extremely high friction level giving the most powerful stopping ability available. The new RD-4 race shoe brake material without a doubt raises the standard for competition shoe linings.

These brake shoes are not cheap. A set of fronts and a set of rears will cost you \$159 apiece. But it is interesting to note that, while Porterfield's catalog offers linings only for 1965-'69 Corvairs, they also claim to reline just about any brake shoe with their proprietary lining materials. So, owners of early Corvairs are not necessarily left in the cold.

You can contact Porterfield by phone at (800) 537-6842 or visit their website at [www.porterfield-brakes.com](http://www.porterfield-brakes.com). There, you will find listings for front and rear brake linings for 1965-69 Corvairs

## LVCC Classified Ads!

*Here we have two Corvairs that were recently put back on the market by their owners, both of whom are members of LVCC. The cars were on display at Das Awkscht Fescht earlier this month, so you may have seen them. We also have additional Corvairs that have been in our Classified Ads for a few months. They are listed on the next page.*
