

# RESCU-ALL<sup>®</sup>

The truly modern and completely functional ambulance and rescue vehicle built on Chevrolet Suburban, ½ Ton and 1 Ton Panel — by the producers of the famous

## AMBLEWAGON<sup>®</sup>

CHEVROLET  
SUBURBAN  
CARRYALL

Design of the new Rescu-All for Chevrolet trucks is based on years of ambulance experience. Every consideration has been given not only to comfort of the patient but also ease of operation by the attendant. Wide opening rear doors facilitate loading and unloading.

Adequate lighting, ventilation and heating of the patient's compartment are included in the standard conversion. There's plenty of storage and cabinet space, too.
